FOSDEM 2020

## LibreOffice turns 10 & what's next.

Michael Meeks <michael.meeks@collabora.com> General Manager at Collabora Productivity

@michael\_meeks, mmeeks #libreoffice-dev irc.freenode.net

"Stand at the crossroads and look; ask for the ancient paths, ask where the good way is, and walk in it, and you will find rest for your souls..." -Jeremiah 6:16

## **Overview**

- The very early beginning
- The OpenOffice Era
- Launching LibreOffice
- Cleaning a giant codebase
- Features vs. Awareness
- Join us to make the future

#### After ten years but really 20 years ... or 35 ...

#### **Grown alongside FOSDEM:**

20<sup>th</sup> year of OpenOffice.org too.

- Luckily we have a museum of old code so you can compare !
- 45th year since Marco Börries releases the first version of

#### **StarWriter Pre-dates MS Office (1985 vs. 1990)**

At this stage just a word processor.

#### Historic Object Orientation mania ...

"Lotus's attempt to copyright words, menus and sequences of events is like someone obtaining a copyright on the sequence in which gears are shifted in a car. ..."

"Unfortunately, Basic is over 20 years old. And you know, in software technology **anything** that's **over 20 years old** is **prehistoric**, just like Teletype terminals or punch cards. **A facelift isn't enough.** 

Let's take the desktop computer revolution to the **next stage**. What we need are true **object-oriented environments**."

Philippe Kahn, Borland founder & CEO, 1991..

The New York Times, August 18, 1991, Section 3, Page 9.

Lotus vs. Borland, reprised as Google vs. Oracle?

Time for a throwaway re-write ...

Object Oriented Magic !

#### **Object Oriented programming #2 +1 year**

#### Borland's - Philippe Kahn:

"Creating the **initial** "**objects**" is **difficult**, especially for programmers Lotus 1-2-3 who are used to designing the old-fashioned way."  $\rightarrow$ 

"But ultimately the **payoff** will be **faster**, **less costly development** of new programs and upgrades."

The New York Times (July 26, **1992**, Section 3, Page 1)

"**If** the objects approach is so great, **Mr. Gates** has said, why are Borland's Windows products **so late**?" Borland

Quattro Pro

#### **Creation of an Object Oriented Toolkit: VCL**

**Visual Class Libraries** 

• Object Oriented  $! \rightarrow$  should be awesome !

**Demo** apps sell better so:

- StarOffice  $3.0 \rightarrow in 1995 \dots$
- A complete redesign of former programs as a crossplatform office suite for Windows, OS/2 and Solaris Sparc
- directly competing with Microsoft Office 95.
- We still have the skeleton and some of this 25+ year old code in LibreOffice today.

was not there myself, but this is as I heard it ...

#### How (not) to Design: Look at the screen: what you see is objects !

- Epic Object Oriented blunders:
  - I see a spreadsheet cell  $! \rightarrow$  object
  - I see a paragraph  $! \rightarrow object$
  - I see a table  $! \rightarrow object$
  - Power ideas:
    - Our file format can just be a recursive serialization of all our objects !!!!
    - Change-tracking makes this too complex: so tack it on the side & mutate the model.
- Oh dear ! Oh dear ...

# Show changes? \* × Do you want to show changes to avoid delays? In the current document, changes are being recorded but not shown as such. In large documents, delays can occur when the document is edited. Showing changes will avoid delays.

Yes

No

#### Fixed many of these things in recent time.

- Binfilter  $\rightarrow$  changing object graph ...
  - hideous hack ... removed in LibreOffice 4.0
- Spreadsheets
  - Massive re-factoring for AMD of the Calc core.
  - Sensible, contiguous type span data structures (MDDS)
  - Huge memory reductions, significant performance improvements
    - Thanks to Kohei Yoshida (Collabora)
- Writer
  - Red-lining turned into a view state not model fiddling festival
    - Thanks to Michael Stahl (CIB) for Munich City.

**Top Tip:** try to spot the panaceas of today and critically examine their claims. Hold onto the good.

**OpenOffice** ... !

#### The heady days of FLOSS fixing everything !

- 1999:
  - Sun buys StarDivision
- Marco Open-Sources
   StarOffice in 2000
  - Dropping E-mail & the desktop for
  - GNOME + Evolution

#### **Attracting developers:**

**Top tip:** get a developer to write & even test your build instructions ...

#### **Development Process ...**

#### **Crazy stuff**

- Fundamental libraries change API randomly
- Low-level library authors mail everyone:
  - "I just re-ordered the parameters in: void copyFile(string src, string dest); to void copyFile(string dest, string src);
  - "please update all your code !"
- Before moving onto their next master-stroke.

**Top tip:** Platform / API churn can rapidly overwhelm the ability of application authors to keep up.

But don't worry, rewriting in Java, C#, Haskell, Rust, will make everything better ...

#### Amazing !?

#### Build tree in a permanent state of brokenness

- Release engineering:
  - Would branch the tree
  - Try to make it build
  - Chase engineers to fix things
  - Merge all of that
  - After a week or so produce a binary snapshot
  - People would re-base their work on that and ... life would continue.

Top commit counts in the world: StarDivision Releng

#### Getting a first build ... a month.

Incredibly pleased to have built OpenOffice !

- With aformentioned, un-tested build instructions
  - \$ cvs update # ... wait 10 minutes
- Weeks more work to get something working again

Created ooo-build

- Maintain a public set of patches & fixes necessary to compile the beast in the 1<sup>st</sup> instance.
  - Built on Frederic Crozat's work for Mandrake (RIP)
- ~Immediately adopted by ~all Linux distros.

#### Something you can actually package:

#### ~immediately built a distro / packager community behind ooo-build:

• A day into the build – it is not supposed to fail ...

## Visited a UK conference, everywhere I went I found frustration ...

#### Heavy duty / run-away Process ...

#### Heavy duty / run-away Process ... #2

#### Lots of things not getting fixed ...

#### **On Contributor License Agreements ...**

Why barriers to entry can be **very** costly to erect:

Fedora Active Accounts

May 2005-Feb 2010

30000 25000 20000 Accounts 15000 Active Accounts 10000 5000 0 08/01 02/0108/01/06 02/01/07 08/01/07 02/01/08 08/01/08 02/01/ 05/01/05 11/01/05 05/01/06 11/01/06 05/01/07 11/01/07 05/01/08 11/01/08 05/01/09 11/01/09

When do you think Fedora dropped their **CLA requirement ?** 

## **Single Vendor Dominance**

No one can control more than 30% of the votes in any statutory body of TDF

#### **Cumulative Frustration & Missed Opportunities ...**

#### And yet - some wonderful individuals ...

Many heroic StarDivision individuals went beyond the call of duty to work with, mentor, and try to ease their own internal process pain for 'external' developers.

Many StarDivision guys were friendly, helpful, respectful, understanding, encouraging and pleasant.

However, there were significant issues of **corporate** / divisional **culture**.

## **TDF / LibreOffice**

Wonderful logo thanks to Christophe Noack.

### LibreOffice: planning it ... 26 days to launch

#### Budapest, Sep 2, 2010

#### Launching is tough ... call in our collective favours ...

#### Management from RedHat

# G

Bryan Stevens EVP & CTO

Jonathan Blandford, Sr. Eng. Mgr

THE POWER O

Caolan McNamara, Hacker & Hero

Re: ooofuture

ok, we're finally green over here in ... land, I've now (9pm Wed) got the formal go-ahead that ... involvement in LibreOffice ... is approved, something we've been **\*cough\*** actually lacking until now, so my ass is now covered again.

One quirk however is: "RE: press release, we'll do it if google does it"

"After you" ... "no after you ..." ... Management from Novell /SUSE

Carlos Montero-Luque, VP Product Mmgt

Dr Jeff Jaffe.

Novell CTO

Markus Rex

SVP & GM OPS

Guy Lunardi, Awesome PM

Two professional PR agencies: Italo Vignoli + SitPub

#### **Un-blocking the magic ... ~10 days to launch**

Hi Chris & Jeremy,

The **slight downer** is that to get a ... supporting press release, they **require one from Google** too [ **out sourcing** your **due diligence** is great like that ? ;-] - is that something that can fly ? we go live 28<sup>th</sup> September; it seems you're the **press release king makers**. ...

We have RedHat and Novell management on-board (jrb being CC'd), and are trying to grow that corporate base. We are driving towards a press release [ of the form: "we plan to create a real foundation, and here is our source code & Beta binaries" ] ...

With such an aggressive timeline, anything that can be done is appreciated. Even without a supporting Google press release, it would be much appreciated to have a Chris DiBona quote, and/or one from Jeremy - who is more acquainted with the details.

Anything with (double) rainbows and ponies mentioned is good I guess and as yet - just some vague commitment to support the growth of the project (as you already do with GSOC) would be great.

... Thanks guys, Michael.

#### **Google came up trumps: 7 days to launch**

Michael and Charles,

It turns out Google can move very quickly when we want to. Here is an **approved quote** from Google you can attribute to: **"Chris DiBona, Open Source Programs Manager, Google Inc.":** 

"The **creation** of the **Document Foundation** is a **great step forward** in encouraging further development of open source office suites. Having a **level playing field** for all contributors is **fundamental** in creating a **broad and active community** around an open source software project.

#### Google is proud to be a supporter of the Document Foundation and participate in the project."

Thanks a lot, let us know how we can help with the Foundation in future.

Cheers,

Jeremy.

#### **Bingo ... unlocked everything.**

Jeremy Allison

#### Have a name – but no logo! 6 days to launch

Beautiful in its simplicity cf. Wikipedia's Logo page example

[ooofuture] Proposal Christoph1 (was: Re: Artwork) This evening I tried a lot of different designs, e.g. using the current "dove" (see the Wiki), ... Well, I ended up with something different that might be weird - but I like it and it seems to fit to our naming and mission statement (but don't trust me at the moment, because I am really tired).

...

Question to all: Do you think its suitable in general? If it just requires some tiny changes ... then this can be easily achieved. And if you want to add some critique, then please feel free to **help me to improve it**. I'm **not experienced in graphics design**, although I know some requirements / pitfalls due to my day job.

Thanks to Christophe Noack

#### Website / Domain Names / Builds ...

Windows & Linux Builds produced by SUSE

Petr Mladek, Fridrich Strba, Thorsten Behrens ٠

Synchronized secretly to MirrorBrain network

Thanks to Dr. Peter Pöml & friends •

Infra setup / Domain registrations etc.

#### OpenOffice.org community members launch the Document Foundation

**Other Supporters** 

- **FSF President** Richard Stallman welcomed LibreOffice release ...
- "Viva la LibreOffice", said Guy Lunardi, product management Director at **Novell**
- Jan Wildeboer ... **Red Hat** is proud to join this effort".
- Mark Shuttleworth ... the **Ubuntu** Project will be pleased to ship LibreOffice ... in future releases

#### More lined up goodwill:

#### **Other supporters:**

- Simon Phipps, a Director of the **Open Source Initiative**. "We welcome The Document Foundation initiative and look forward to the innovation it is able to drive ...
- "We welcome the LibreOffice project to the free software community ..." says Stormy Peters, Executive Director of the **GNOME Foundation**.
- Patrick Luby, of **NeoOffice** says "I am happy to see a new, independent LibreOffice foundation
- "... **BrOffice.org** and The Document Foundation share the same values and objectives and we are more than happy to be part of it.", says Claudio Filho
  - Tons more ... collected a vast page listing supporters ...

#### Looks familiar ? ...

#### LibreOffice 3 The Document Foundation

LibreOffice 3.3.0 000330m19 (Build:6) tag libreoffice-3.3.0.4

**Technical wins:** *under the hood* 

### **Engineering Steering Committee ...**

Talking & ensure everyone is heard

Many large FLOSS projects fight tooth & nail

- Module 'maintainers' Rampant waste & re-writing
- Bickering, and passive aggression.

Whole team are peers ... no-one 'owns' modules

• Respect input from local experts: of course !

**Calls live transcribed to reduce English listening needs** 

• Avoids the "Confused IRC wait-fest" problem.

Using Email to Resolve Conflicts Is a Reliable Way of Making Everything Worse

Magic conflict reduction tool

### GNUmake $\rightarrow$ 1 make to build ~10k wide

Completed re-write of legacy perl + dmake build system ...

Thanks to Bjoern Michaelsen & team. 250 200 150 150 100 50 0 3.3.0 3.4.0 3.5.0 3.6.0 4.0.0 4.1.0

### "LibreOffice is now ridiculously easy to build" Karl Fogel – (now working on "Producing OSS" (v2) ...)

gnumake vs. dmake by module count

#### Security: Coverity ... score 0.00

#### **Excellent static checker.**

#### **Systematic load crash testing: 100k+ files**

Import crashes over time crashes/asserts \$ S N

master build instances

#### **Systematic save crash testing: 100k+ files**

master build instances

#### **Quality German Comment Translation: 6.5 years ...**

**Detected lines of German comment** 

### Unit testing - don't fix the same bug twice or more.

Growth in unit tests over time

count of various CPPUNIT macros

### **Callgrind based automated performance testing.**

#### Built-in crash-reporting: nailing the worst bugs ...

LibreOffice Crash Reports - Powered by Crash, Inspired by Second - All dates are UTC

### **Code quality improvement ...**

#### New tools find new bugs – and over time that reduces

• coverity<sup>®</sup> Commits per month easily attributable to various tools 250 WaE A Synopsys Company valgrind 200 FORCEPOINT ubsan ofz 150 forcepoint crashtesting 100 cppcheck coverity 50 asan **Google:** afl 0 **OSS-Fuzz** 

Use lots of different fuzzers / checkers !

### Active code committer count per month ...

Committers by Affiliation vs. time

### **Commits (pre-git in 2010 ~unreliable)**

# Native-language communities

**110n teams are growing**, we have currently (Weblate stats)

- 145 used languages ~119 shipping.
- 4605 users
- 404532 translations made

Many thanks to so many for their hard work translating !

# Meeting up to plot the future !

# Ignoring tons of post 2016 features ...

# **Online / Cloud integrations**

#### Alfresco connector available thanks to Arawa & Magenta

• Implemented in Java

collabora online.com

collaboraonline.com

#### **EGroupware**

#### Connector available thanks to eGroupware from their repository

- https://github.com/EGroupware/collabora
- Implemented in PHP + JavaScript
- To match their integration needs, we have
  - Improved the printing in Firefox
  - Updated dockerfiles

### Kolab

#### Connector available thanks to Kolab themselves.

- https://git.kolab.org/source/wopi/
- To match their integration, we had to expose various functionality via postMessage
  - Like closing all the views from the master view, downloading or printing

collabora online.com

## Nextcloud

#### https://github.com/nextcloud/richdocuments

- Implemented in PHP and JavaScript
- Many features in the Online were implemented to managemented to managemented.
  - Specification of avatars in CheckFileInfo
  - Support for templates TemplateSource in CheckFileInfo
  - /hosting/capabilities for early check of whether a particular version supports some features or not
  - And many more...

## ownCloud

- https://github.com/owncloud/richdocuments
- Implemented in PHP and JavaScript
- To match their integration needs, we are improving Watermarking substantially
  - So that each user in a document can have a different, dedicated watermark

collaboraonline.com

## **Pydio**

#### Available thanks to Pydio

- https://github.com/pydio/pydio-core/tree/develop/core/src/plugins/editor.libreoffice
- Implemented in PHP and JavaScript
- To match their integration needs, we had to extend what characters can be used in the access\_token

#### collaboraonline.com

#### Roove

#### **Connector implemented by SoftDistribution**

Suchen:

Seite 1 von 2 281 Wörter, 1.915 Zeichen

For their integration, we had • to improve Save as and full-screen handling of presentations.

Standardauswahl Englisch (USA)

#### **Mattermost**

collabora online.com

# Why show you all that ? because we're engineers just make a better mouse-trap ... !

## **Trademarks / Brands / Marketing - important ...**

#### Took 5 years to overtake OpenOffice.org's Google Trend

- Software Features, Quality, UX, all hugely better but ...
- Still serving ~250,000 downloads per week to disappointed users.

 $+ \diamond <$ 

## You think it is about the code ....

Really Branding, Trademark, Ecosystem

- Almost more important ...
- Economics drives almost ~everything

#### Web interest to Companies

## LibreOffice downloads @ 0.8 - 1.2m/week+

## Grateful to our generous donors for funding infra

The Future ...

## Who can predict the future ?

Listen to our users & visionaries:

- "Everything will move to the web / Online !"
- "I'm thrilled with my native Chrome-book LibreOffice!"
- "I want to collaborate on my mobile Phone !"
- "I want to load & edit docs even off-line"
- "I want to chat & collaborate live, on-line with no network" ... (!?)

Working closely with others ...

#### Need smart people to help us create the future

• An Artificial Intelligence

of stunning subtlety, of conversational brilliance

- That can understand what you're doing
- And can suggest cool new things to do.
- "Trained on Documents" (TM)

# The easy to predict Future ... already done pending release

#### Get it at the Univention App Center

The easiest way to install CODE for a quick tryout is to download it as a <u>virtual appliance from</u> the University App Center. This appliance contains the Collabora Online Development Edition, and the additional software you need to get you up and running in minutes. You can choose between two types of integration, CODE + Nextcloud or CODE + ownCloud. Each appliance is available in four formats: KVM, Virtu https://hub.docker.com/r/collabora/code/

#### Grab CODE docker image from Docker Hub

The <u>collabora/code</u> Docker image can be installed to any x86-64 host (e.g. on Linux and Windows 10), and it is fully configurable. For more information about setup and configuration for deployment, please read the <u>CODE Docker page</u>. If you want to try it out quickly, you can set up CODE docker image with file sharing integration in less than 5 minutes in a very basic way, following these instructions: <u>quick tryout with ownCloud</u> or <u>quick tryout with Nextcloud</u>.

Get involved:

## We paid the technical debt ... what's next ?

#### Easy Hacks:

- A great way to get involved ...
- https://wiki.documentfoundation.org/Development/EasyHacks

#### Paid down much of the technical debt

- Lots more things to be done [!]
- Love Javascript ? C++ ? UX design ? Documentation ? Sysadmin ? Translation ? Marketing / Advocacy ?

#### **User Experience**

- Tons of paper-cuts, significant wins & good things to do
- Also Documentation: to keep up with that !

## **Conclusions & Questions ...**

- Did what we had to to make this code-base survive & thrive.
- Thank you to all the many, many people I didn't name for their amazing contributions.
- Help Guard our Digital Sovereignty

• We need your help !

- Challenging & fulfilling work
- Join the LibreOffice team
- We rely on your support !
  - Thank you for it !

Oh, that my words were recorded, that they were written on a scroll, that they were inscribed with an iron tool on lead, or engraved in rock for ever! I know that my Redeemer lives, and that in the end he will stand upon the earth. And though this body has been destroyed yet in my flesh I will see God, I myself will see him, with my own eyes - I and not another. How my heart yearns within me. - Job 19: 23-27
